

Guide for Entering Kindergarten Oral Health Assessment Data into the SCOHR Program

Entering data is required by July 1st of the school year

What is SCOHR?

The System for California Oral Health Reporting (SCOHR) is a web-based means of collecting and centralizing all required, aggregate student data to meet the AB1433 reporting requirements.

Why enter the data?

Entering aggregate data into SCOHR helps schools keep track of their own data and compliance. The information also helps school, county and state decision makers better understand the current status of students' oral health so that interventions can be implemented to improve the health of children in our schools.

Scan or click QR code for registration, current forms and training video

There are two ways to enter aggregate data

Whether entering the data manually or uploading, all 21 data points from the following forms must be collected:

1. Oral Health Assessment Form: Includes number of students, assessment results and referral information.
2. Waiver of Oral Health Assessment Requirement: Includes number of waivers and reasons for waivers.
3. On-Site Dental Screenings Opt Out Letter: Includes total number of students that did not participate in school on-site assessments.

Manual Entry of Data

- Click on "Data Input" on the top of the page upon logging in.
- Click on "Data Input Form".
- Find the appropriate school and enter the aggregate data manually as seen in the screen shot below*.
- If you do not see the list of schools, email scohr@sjcoe.net for support.
